SMFR Special Operations Training Report
July 2018

The month of July 2018 was used in review of basic hazmat incident leak sealing. All SMFR Hazmat Techs rotated through station 3 and got hands on activities with 8 leak sealing stations using training props from Hillsborough County and in-station props to challenge them to different scenarios.

Other topics and issues handled in July:

- The B-shift Hazmat Technician class is still on course with completion expected for August 2018. We are completing outside activities and will focus on scenarios and exercised. Classroom sessions were held throughout the month on B-shift. All 5 students will be completing their state examination in September 2018.
- Capt. Bloski was expecting to testify in a hazmat civil domestic case. Interviews were held with SMFR attorney to explain the incident and expected court action. This was scheduled for July 30 but was postponed with the court system. Documents have been requested by the State Attorney.
- Capt. Bloski attended FBI training in Ft. Myers on July 10th in regards to updates on hazmat evidence collection and review of state policy on hazmat working with law enforcement.
- Operations tactical completed on 5600 Natalie Way-COB water treatment and given out to engine crews. This was a large tactical due to 9 different chemicals that were researched.
- In anticipation of our September 2018 State Audit Special Operations #407 LPG/ Propane response was reviewed and submitted to directives committee.
- Capt. Bloski continues to work with the SMFR disaster planning meeting led by BC Perry.
- Capt. Bloski attended the Manatee County Training Officers meeting on July 16th. During this meeting the State FDEP made a presentation on handling small fuel spills to all districts.
- A report was made on SMFR Hazmat Capability to the Florida Department of Environmental Protection on services provided for their internal accounting.
- Special Operations #408 on Natural Gas, CNG, and LNG response was drafted and forwarded to the directive committee. SMFR is the first in southwest Florida with a hazmat response policy for Liquified Natural Gas vehicles.
- Capt. Bloski assisted MTC Fire Science with 8 students completing the 24 Hr. Hazmat Life Safety & Command course from July 23-25. Two SMFR students attended needing the course.
- Capt. Bloski and BC Gould presented to the regional trauma board meeting a case study on the military ordinance with patient injury that happened in April 2018 on July 25th at Manatee EOC.
- Work continues on Directive #413 Decontamination Directive with BC Gould. Another 3 directives were given to SMFR Sta. 2 lieutenants for their review with crews. It estimated that only 2 more polices are needing review to be prepared for Sept. 2018 state audit.

- At the request of the Bureau of Radiation Control for radiation response, an equipment needs list was completed and forwarded to the state. This list was a state response on radiation equipment the state may be forwarding to state teams.
- Research was conducted for DC Bounds investigating the use of solar power in the stations. We are continuing our research.
