Notwithstanding the schedule provided above entitled "all other buildings or structures" the District finds that within the District's jurisdictional boundaries there is one (1) industrial complex under single ownership that has more than 2.3 million square feet of structures on a site of contiguous parcels or a site of parcels that would be contiguous except that they are dissected by one or more transportation rights-of-way. The District finds that said industrial complex possesses self-contained, internal fire suppression facilities within its buildings and structures that improve the industrial complex's hazard classification such that the complex receives less of a special benefit from the District's fire protection service. Therefore, in consideration of the internal fire suppression facilities contained within the industrial complex, the above referenced industrial complex's non-ad valorem fire assessment shall be assessed at one-half the rate for factory/industrial, regardless of the actual use of the building.
